Chemical Activities Status Report. Second Edition. Volume II.

Dec 80

PERFORMER: Environmental Protection Agency, Washington, DC.
Office of Pesticides and Toxic Substances.
EPA-560/13-80-040B

See also 2nd edition, Volume 1, PB81-176414.

In brief, this report is organized into three sections. (1) Alphabetized Chemical Name Reference Listing (an index of names used for chemicals included in the text). (2) Chemical Name Synonym List (showing all synonyms for chemicals in the text, and arranged by CAS Registry Number). (3) EPA Chemical Activities Report (arranged sequentially by CAS Registry Number). Sections 1 and 3 are in Volume I, Section 2 is in Volume II.

KEYWORDS: *Chemical compounds, *Hazardous materials, *Toxic substances.

Chemical Activities Status Report

Second Edition

Volume II

Compiled under the direction of:

Data in this publication is current as of July 1980

Introduction

The following compilation of EPA's chemical-related activities is as complete as we can make it; however, there may be omissions or inaccuracies. In an effort to maintain a current data base, and to perfect future editions, we would appreciate having comments and any corrections or additions you may have.

The following pages contain suggestions for users. In brief, this report is organized into three sections.

1. Alphabetized Chemical Name Reference Listing (an index of names used for chemicals included in the text).

2. Chemical Name Synonym List (showing all synonyms for chemicals in the text, and arranged by CAS Registry Number).

3. EPA Chemical Activities Report (arranged sequentially by CAS Registry Number).

Sections 1 and 3 are in Volume I, Section 2 is in Volume II.

Comments, updates, and suggestions should be addressed to:

Suggestions for Users

The decision to organize EPA Chemical Activities by CAS Registry Number (CAS number) is an outgrowth of a recommendation of the Information Exchange Groups of the Interagency Liaison Group that CAS numbers and CAS Preferred Names be used to standardize chemical nomenclature.

We recognize that many people who will be using this report are not accustomed to using CAS numbers. For this reason, we are placing the index (Part I, Alphabetized Chemical Name Reference Listing) at the front of the book.*

Because people interested in chemicals often want to know what other names are applied to a chemical of interest, we have included a listing of synonyms (Part II, Chemical Name Synonym List).

After obtaining the CAS number for the chemical of interest, the user should then turn to Part III (EPA Chemical Activity Report) to ascertain what EPA activity relates to that chemical. In a number of instances, there will be only one entry; in others, as many as eight.

The text should be largely self explanatory. The items in each chemical report indicate: Authority, Activity, Status Reason, and Contact. A few items will require some clarifications.

First, statutory authorities and sponsoring organizations are abbreviated. The following listing gives those abbreviations:

**The sequence of chemical names that appear in the Alphabetized Chemical Name Reference Listing was produced by computer program. The program ignores all single characters for alphabetizing purposes. Numbers and letters (Roman and Greek) are not considered when they stand alone; i.e., if they are separated from the main body of the chemical name by a comma, dash or space. A few simple examples will illustrate this: t-butyl alcohol is alphabetized under b, while tert-butyl alcohol would be alphabetized under t; 4-dichlorobenzene and p-dichlorobenzene are alphabetized under d, while para-dicholorobenzene would be alphabetized under p; α-lindane is alphabetized under l, while alpha-lindane would be alphabetized under a.*

Statutes:

Notes on Entries:

Under "Activity," "regulation" can be addressed as "in development," "proposed," or "promulgated" in the "Status" category.

Under "Activity," "preregulatory assessment" refers to a study that will produce some or all of the data to support a regulation or a regulatory decision. A preregulatory assessment will not always result in a regulation. These will have "Status" entries of "in development" or "completed."

The "Activity" designated as "technical assistance data" includes the OHM/TADS and other files giving chemical characterization and hazard data, as well as guidance for handling chemical accidents and problem chemicals. All of these entries have "completed" "Status."

The "Activity" identified as "RPAR" will also appear as having "completed" status. This means that an RPAR was issued, not that a final regulatory decision has been made.

The additional "Activity" items are self-explanatory. "Risk assessment" may be somewhat arbitrary, as the outcome of such an effort may not be a full-scale assessment of risk, but only a documentation of one aspect of risks or hazard.

"Status" entries are largely explained above. A few activities are described as being "in litigation" (when an action is being challenged in court), and "deferred" (in this case, giving a date and reason).

"Reasons" include "Suspect Carcinogen/Oncogen" (includes known as well as suspect substances) "health effects other than oncogenicity" (including knowledge or suspicion of mutagenicity, teratogenicity, and/or chronic effects), "environmental effects," "high volume production" (as determined by the organization responsible for the activity), and "Congressional mandate" (especially when a statute includes a specific mandate to address a chemical). The "Reason" entries: "member of class of concern," "surrogate for class." "metabolite of," "similarity to carcinogen(s); and contamination with" will identify the CAS # of the appropriate chemical or the SEQ # of an unregistered class that appears in the publication. If the class or chemical is not a part of this report, it will be identified by a name.

"Contact" usually refers to a specific individual, especially if the "Activity" is "in progress." The one major exception is in the RD items, in which case a six-digit number appears. This number identifies the file number of ORDIS (the Office of Research and Development Information System). The ORDIS printout will supply a detailed abstract of the project and a detailed listing of keywords, as well as information concerning by whom and where the study is being conducted, and the ORD/EPA project officer. To obtain the ORDIS printout(s) you are interested in, please addresss a written request to:

Mr. Ron Cullember, Center for Environmental Research Information,
U.S. Environmental Protection Agency, 26 West St. Clair, Cincinnati, OH 45268

Some "completed" activities will cite "report" as the contact, especially when the project manager is no longer with the Agency. The Report number will be given under the "Status" entry, and usually can be obtained by request from the sponsoring office.

Sources of Lists Included in the Text:

Clean Air Act

Criteria Pollutants designed under Sec. 109 of the Act (40 CFR 50).

Chemicals addressed under new source performance standards (Sec. 111) (40 CFR 60).

National Emission Standards for Hazardous Air Pollutants (Sec. 112) (40 CFR 61).

Assessments in Progress, obtained from the Office of the DAA, Air Quality Planning and Standards.

Clean Water Act

OHM-TADS (Oil and Hazardous Materials Technical Assistance Data), obtained from Oil and Special Materials Control Division; kept under authority of Sec. 311, and used to support the National Contingency Plan (spill response).

Hazardous Spill Regulations. Promulgated or proposed under Sec. 311 of the Act, and obtained from the F.R. Notices.

Toxic Substance Effluent Regulations proposed and promulgated under Sec. 307(a) of the Act, and obtained from 40 CFR 129, and the Criteria and Standards Division.

Water Quality Criteria proposed under Sec. 304 of the Act. Included in consent decree, and obtained the F.R. Notices of March 18, July 28, and October 1, 1979.

Note: Effluent Guidelines were not included because they are not chemical specific; however, controlling certain gross parameters will afford an unspecified degree of reduction in certain toxic chemicals.

Federal Insecticide, Fungicide, and Rodenticide Act

Major cancellations and suspensions, obtained from a compilation prepared by the Pesticide Enforcement Branch. This includes partial as well as total cancellation (e.g., the most hazardous uses may be cancelled, and other uses permitted with or without restrictions).

RPAR's issued under the reregistration authorities of Sec. 6. Rebuttable Presumption Against Registration (RPAR) is the normal first step toward cancelling or modifying pesticide registrations, although RPAR may not result in such action.

Preregulatory assessments address those substances being considered for RPAR.

Restricted use pesticides are those that must be applied only by certified applicators.

Resource Conservation and Recovery Act	Chemicals and waste streams designated as hazardous under Sec. 3001, obtained from the F.R. Notice of May 19, 1980.
Safe Drinking Water Act	Interim Primary Drinking Water Regulations promulgated under 40 CFR 141.
	Interim Secondary Drinking Water Regulations, obtained from the F.R. Notice of March 31, 1977.
	Indicators of Industrial Pollution used to determine need to treat water supplies, from the F.R. Notice of February 9, 1978.
	Chemicals under review for possible regulation, from ODW.
Toxic Substances Control Act	Testing recommendations by the Interagency Testing Committee (ITC), under SEC. 4(e) authority. (F.R. Notices)
	Preregulatory Assessments: Chemical Hazard Identification Profiles (CHIPs) and Phase I reviews, as obtained from the Office of Toxic Substances (CHIPs are summary reviews of readily available literature which present information characterization, uses, and effects of chemicals. Phase I reviews involve detailed study of secondary information sources).
	Chemicals regulated under Sec. 6, and proposed for reporting rules under Sec. 8(a).
Other	ORD/CAG reviews to support assessment under the foregoing statutes. Listing supplied by CAG.
	ORD projects, from a search of the ORDIS and communications with project officers.
